The Liquidity Coverage Ratio (LCR) measures whether a bank has sufficient High-quality Liquid Assets (HQLA) to survive a significant stress scenario lasting 30 calendar days.

The LIQ1 table complies with the Pillar 3 requirements as stipulated by BCBS D400 (March 2017) and Directive D8. The values in the table are calculated as the average of the 90-day calendar daily values over the period January to March 2025 for Discovery Bank Limited. Discovery Bank's weighted values are based on business days (excluding public holidays and weekends).

Deposits within the 30-day window are the key drivers of LCR. The weighted outflow is determined by the liabilities falling into the 30-day contractual bucket. The required HQLAs to be held are based on the characteristics of the liabilities within the 30-day bucket to set-off modelled stressed outflows.

THE COMPOSITION OF THE HIGH-QUALITY LIQUID ASSETS (HQLA):

The HQLA's held by Discovery Bank are Treasury Bills and SA Government Bonds with a maturity profile, spread up to 10 years as well as the surplus balance within the SAMOS account, based on the new Monetary Policy Implementation Framework (MPIF) model.

LIQ2: Net Stable Funding Ratio (NSFR)

This section provides information pertaining to Discovery Bank's Net Stable Funding Ratio (NSFR) and details of some of its components.
