HOW TO SEARCH FOR A PATIENT

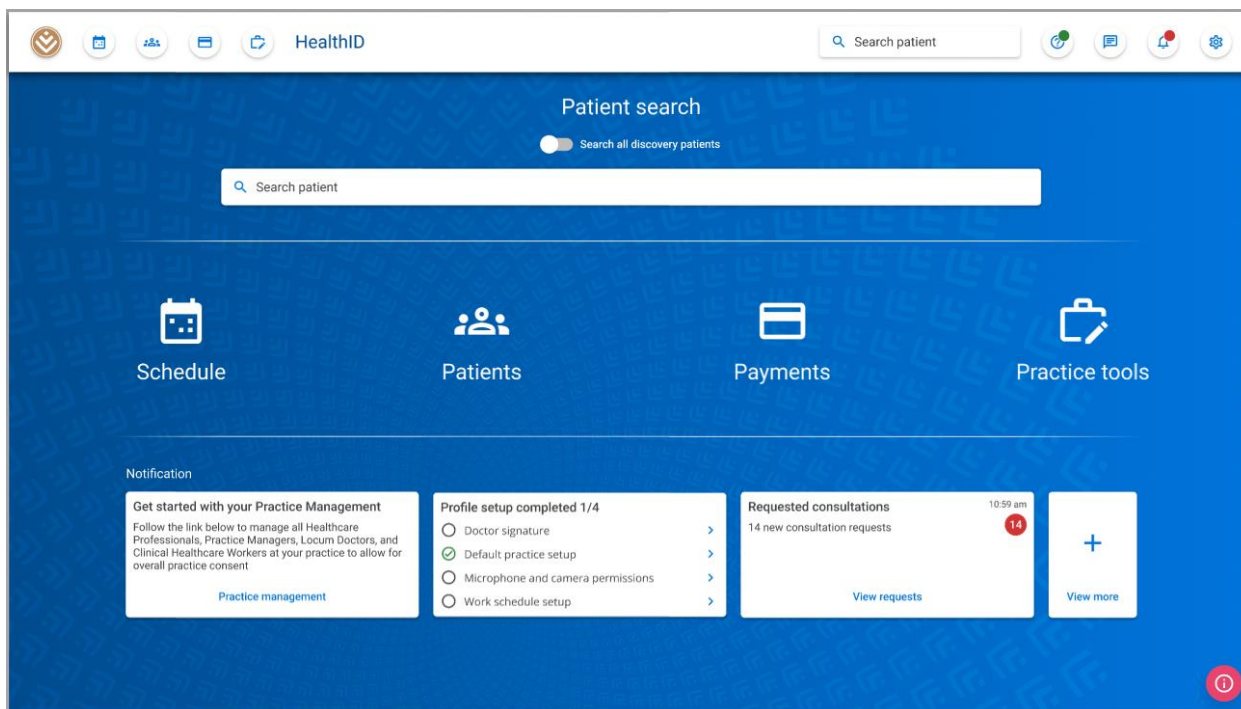

DISCOVERY HEALTH
2023

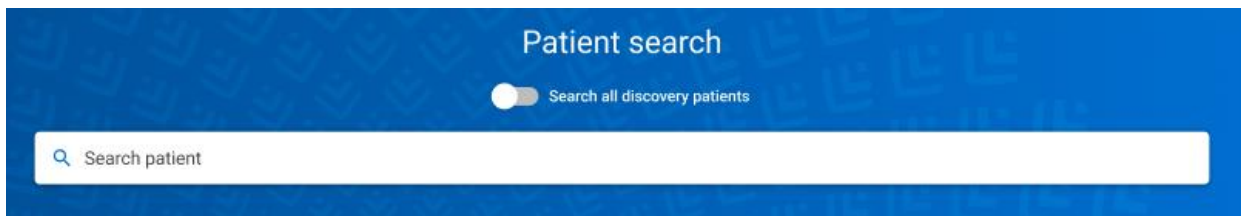

How to search for a patient

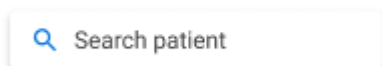

1. Search for the patient's profile by their name or surname using the Patient search bar on the dashboard or the Search patient button in the header.

Dashboard

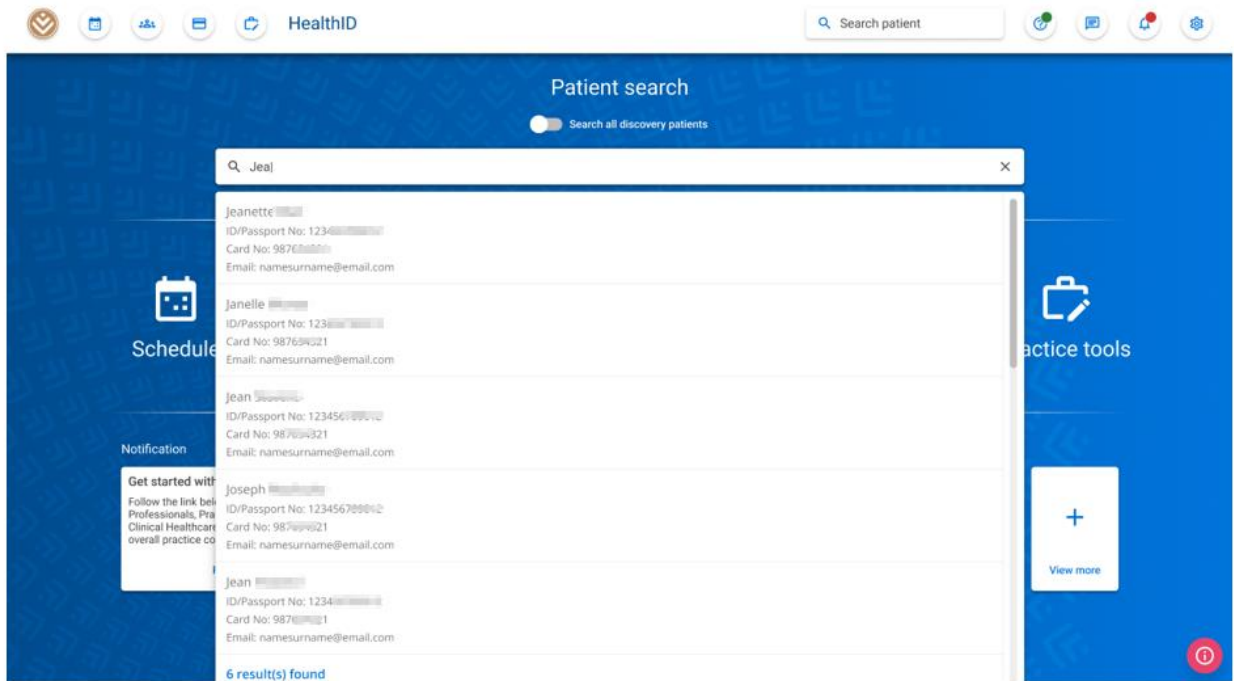

Patient search search bar on the dashboard.

Patient search in the header.

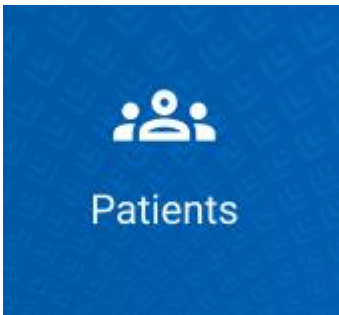

2. Click on the most appropriate result from the list of results the search gives. If you do not see the patient you are looking for, try using a different search term (such as the patient's ID number or membership number).

Search results.

3. To view patients within your list or patients for whom you have consent, click on the **Patients** icon on the dashboard or in the header.

Patients icon.

4. On this page, you can navigate through your patient list using the numbered lists as per the bottom of the page. When you select a patient from the patient list, we will take you to the patient's file (much like a search would).

The screenshot shows the 'My patients' interface in the HealthID system. At the top, there is a navigation bar with the 'HealthID' logo and a search bar labeled 'Search patient'. Below this is a blue header with a back arrow and the text 'My patients'. A filter menu is open, showing 'All' selected. The main content is a table with the following columns: NAME, SURNAME, SEX, AGE, LAST CONSULT, MEDICAL AID PLAN, and NOMINATION. The table contains seven rows of patient data. At the bottom left, there is a 'Show: 07' dropdown and the text 'Showing: 1 - 7 of 400 patients'. At the bottom right, there is a pagination control showing '01 of 57' with navigation arrows. A red notification icon is visible in the bottom right corner of the interface.

NAME	SURNAME	SEX	AGE	LAST CONSULT	MEDICAL AID PLAN	NOMINATION
Jeanette		F	42	01/02/2020	Essential Delta Comprehensive	Yes
Brian		M	48	26/03/2022	KeyCare Plus	Other
Lungile		F	32	08/04/2022	-	No
Francois	N	M	25	17/12/2021	Essential Saver	No
Noma	F	F	28	22/02/2022	Classic Delta Saver	Yes
Armand		M	33	13/12/2021	-	Other
